DETAILED ACTION

Allowable Subject Matter

1. Claims 2-8 and 13-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: Lewis et al. do not teach a method for reporting data network monitoring information that includes accessing a set of performance metric values for a network component, generating a trace based on the values; building a histogram for a selected histogram range of the trace, generating a performance monitoring display concurrently including a graph of the trace and a representation of the histogram where the y-axis of the graphed trace includes ranges of values for the performance metric values and the histogram includes reusing the range of values as metric value ranges for the histogram, as shown in claim
3. Ennis, Jr. et al. do not teach an user interface that includes a first graphical representation plotting a trace and a second graphical representation illustrating a histogram where the data points in the trace are averages determined by processing previously built histograms for the network performance metric for the network component corresponding to the data points, as shown in claim 14. None of the prior art teaches a method for reporting data network monitoring information that includes accessing a set of performance metric values for a network component, generating a trace comprising graph data points based on the metric values, building a histogram based on a selected histogram range of the trace and generating a user interface that displays the trace and the histogram wherein each graph data point in the trace

corresponds to a histogram and the trace is generated by determining and plotting an average value of each of the graph data point histograms, as shown in claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
